Phishing Attack on a College Student

1. Case Description

Rohit, a first-year college student, received an email that appeared to be from his bank. The email stated that his account would be blocked due to "suspicious activity" and asked him to verify his details immediately.

---

2. How the Attack Happened (Step-by-Step)

1. **Rohit received a professional-looking email with the bank's logo.**
2. **The email created urgency by warning that his account would be blocked within 24 hours.**
3. **It contained a link labeled "Verify Your Account."**
4. **Rohit clicked the link and was redirected to a fake website that looked identical to his bank's login page.**
5. **He entered his username, password, and OTP.**
6. **Within minutes, money was deducted from his bank account without his knowledge.**

---

3. Who Was Targeted?

- **Rohit (a student with limited awareness of phishing scams)**
- **Users who trust emails without verifying authenticity**
- **People who react quickly to urgent messages**

---

4. Consequences

- **Rohit lost ₹15,000 from his bank account**
- **His banking credentials were compromised**
- **He had to block his account and file a complaint**
- **Emotional stress and panic**
